Font type: Tahoma

Color: blue

40pt center aligned

**Colombo West High School**

World Environmental Day

H1 heading:

Font type: Arial

Size : 30pt , center

Aligned, underlined

Color: green

*Come join us plant 1000 trees on World Environmental Day and make a difference.*

Paragraph:

25pt , italic

Background-color : #FF2CFB

**Question 02**

**(25 Marks)**

Consider the following form:

**Srilanka Automobile Importers Association**  
  
**Vehicle Order Confirmation**  
  
Customer Name   
E-mail Address:   
Invoice No:   
  
Payment Method    
  
I Agree to the terms and conditions ☒

Write a JavaScript to include the following validations for the data input through the above form.

- The 'Customer Name' field should not be empty.
- The 'E-mail address' entered should be a valid e-mail address.

- The 'Invoice Number' entered should be a numeric value.
- A Payment Method should be selected from the list.
- The "I Agree to the terms and conditions" checkbox should be checked.

Display suitable messages to the user based on the result of each validation.

### Question 03

(25marks)

A) Create the following form using HTML to upload a file.

#### Uploading a file

Select the file to be uploaded

The form consists of a text input field, a 'Browse...' button, and a 'Send File' button.

(20marks)

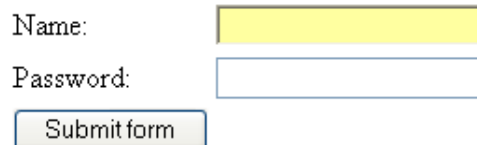

- B) Write a PHP page to display actual name, file type and size of an uploaded file.  
 C) Write a PHP program to display the text content of the uploaded file

### Question 04

(25 marks)

- A) Create the following form in HTML. When the user clicks the submit form button, insert data into a database table named login table and display the name and password on the same page below the form using PHP codes.

## Enter your Data

The form has two labels: 'Name:' and 'Password:'. The 'Name:' label is followed by a yellow text input field. The 'Password:' label is followed by a white text input field. Below these fields is a 'Submit form' button.

- B) Modify this example so that the username and password will be displayed on a separate page.
- C) Create an HTML form to enter a name and marks of a student. Create a PHP page to access this data and if the student has got marks 50 or above, display the output as "You have Passed and else display the output as "You have Failed".
