SE 102.3 Web Application Development
Tutorial 01

Objective

Understand the use of basic HTML tags.

Exercise

1. Set up your environment.
   i. Create a new folder and rename it with "IndexNo/Tute01".
   ii. Create a folder called "images" inside the "IndexNo/Tute01" folder.
   iii. Download relevant images, name them properly and save it inside the "images" folder. (ex: company logo, user logo, product images)

2. Refer to the given web pages and codes to develop the site. Save each web page inside the "IndexNo/Tute01" folder using relevant names with the ".html" extension.

index.html

```html
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8" />
    <!-- add a title -->
    <!-- link the stylesheet -->
  </head>

  <body>
    <!-- add a heading -->
    <!-- add a horizontal line -->
     <!-- add a heading -->
     <!-- add a form –>
        <!-- add radio buttons –>
        <!-- add a selection list –>
        <!-- add a checkbox list –>
    <!-- add a reset button –>
    <!-- add a submit button -->
    <!-- add a horizontal line –>
    <!-- add a footer –>
        <!-- add an image –>
        <!-- add text  –>
     </body>
</html>
```
